

Sustainability Services

Company Overview

Madison Environmental Group, LLC is an interdisciplinary, team-oriented sustainability consulting firm that assists clients and communities to reduce their environmental impact and create economic advantage. Our services help our customers build, manage, and live green. Our areas of expertise include:

- **Sustainability Planning**

Madison Environmental Group, LLC can assess, develop and implement a Sustainability Plan that significantly reduces an organization's environmental impact while saving money through reduced operating costs and improved productivity as well as building employee and community relations.

- **Greenhouse Gas Emission Assessments**

Madison Environmental Group, LLC can conduct greenhouse gas emissions inventories using World Resource Institute protocols to quantify the carbon footprint of an organization. This service provides baseline data and reduction goals to meet or exceed climate change standards.

- **Green Building Consulting**

Madison Environmental Group, LLC can offer assistance in creating plans and managing processes to ensure environmentally responsible and sustainable building construction, operations, and maintenance. Our staff specializes in LEED (Leadership in Energy and Environmental Design) New Construction and Existing Building Operations and Maintenance (EBOM) certification and tailors these services to meet specifications for LEED certification.

- **Construction and Demolition Waste Management**

Madison Environmental Group, LLC can provide Deconstruction and Construction Recycling and Reuse Plans to assure that projects comply with complex regulations and ordinances. The special attention we give to managing, monitoring, and documenting recycling activities has resulted in recycling up to 95% of debris during deconstruction and construction, reducing the waste disposal bill up to 50% and helping our clients gain LEED points.

- **Commuter Transportation Management**

Madison Environmental Group, LLC can plan, develop, and implement creative transportation management programs that encourage staff, students, and visitors to drive less. The transportation program can be used to meet city requirements and reduce parking infrastructure expenditures by decreasing the number of single occupancy vehicles traveling to a site.

- **Education and Training**

Madison Environmental Group, LLC can provide employee sustainability education using our EnAct: Steps To Greener Living program as a tool for establishing a Green Team in the work place. We also provide LEED training and Living Building Challenge presentations.

Madison Environmental Group, LLC was founded in 1999 and is a registered Woman Owned Business Enterprise and Small Business Enterprise with the City of Madison.
